

Bentley Head Unit Replacement Kit

Part No: 1312

BEFORE

AFTER

Many Bentley Vehicles have outdated technology, some don't even have basic Bluetooth telephone functionality or even a reverse camera. But until now, it was virtually impossible to replace the factory radio with an aftermarket Navigation System that has far superior technology whilst maintaining all of the extra vehicle functionality controlled through the original Bentley Audio System.

NAV-TV have come up with the perfect solution to solve this problem and replace the outdated or broken OEM radio easily and quickly with this Plug & Play kit that includes everything necessary for installation.
